

SALMAN KHAN D

AI Engineer

Tamil Nadu, India | +91 93422 98949 | salmanvahith29@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

AI Engineer with hands-on experience across the full ML lifecycle — data preprocessing, model training/evaluation, and REST API deployment — built during a **Machine Learning & Data Science internship at Yellowmatics** using **TensorFlow**, **PyTorch**, and **Flask**. Delivered 15+ AI/ML, computer vision, and full-stack applications, including LLM-powered products (career coaching, resume analysis, interview simulation) and 25+ **n8n**-based agentic automation systems built on **GPT-4** and **Claude**. Combines applied ML engineering with production full-stack delivery (**React**, **Next.js**, **Vercel**) to ship AI features end-to-end.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++, SQL, HTML/CSS

AI / Machine Learning: Machine Learning, Deep Learning, Computer Vision, NLP, Model Training & Evaluation

Generative AI / LLM: LLM Application Development (GPT-4, Gemini), Prompt Engineering, AI Agents, Agentic Automation (n8n), Claude Code & Claude Skills, Custom GPT Development

Frameworks & Libraries: TensorFlow, PyTorch, OpenCV, YOLO, Transformers, Flask

Web / Full Stack: React.js, Next.js, Node.js, WordPress

Cloud, Tools & IoT: Vercel, Firebase, GitHub, Git, Raspberry Pi, IoT Sensors, Supabase, Airtable

EXPERIENCE

Machine Learning & Data Science Intern — Yellowmatics

- Built and optimized **computer vision** and predictive **machine learning** models using **TensorFlow** and **PyTorch** for real-world prediction and classification tasks.
- Owned the end-to-end ML lifecycle — data preprocessing, model training, evaluation, and **REST API** deployment via **Flask** — for production-facing model integration.

Freelance Tech & Creative Lead — Strikkerz Team

- Developed and deployed **React.js** and **WordPress**-based web applications, owning UI/UX design and content strategy.
- Managed end-to-end deployment pipelines using **GitHub** and **Vercel** for client-facing production releases.

PROJECTS

AI Career Coach / *React/Next.js, LLM API, Full-Stack*

- Developed a full-stack AI career coaching platform combining a **React/Next.js** frontend with a backend API and persistent user sessions.
- Integrated **LLM APIs** to deliver resume analysis, skill-gap identification, roadmap generation, and job matching through conversational AI guidance.

ML-Based Home Security System / *Raspberry Pi, IoT, Machine Learning*

- Engineered a **Raspberry Pi**-based IoT security system with ML-driven anomaly detection for real-time threat identification.
- Authored and presented a research paper on the system's anomaly-detection approach at an academic symposium.

Object Detection & Information Extraction System / *YOLO, OpenCV, Computer Vision*

- Built a real-time **YOLO**- and **OpenCV**-based computer vision pipeline for visual analytics and automated information extraction from live video.

Agentic AI Automation Platform (n8n) / *n8n, GPT-4, Multi-Agent Systems*

- Designed 25+ production-style **n8n** multi-agent workflows (e.g., NAAC accreditation, NIRF ranking automation, faculty workload balancing, cold-outreach personalization), each orchestrating specialist **GPT-4** agents via a master-router pattern.
- Applied **prompt engineering** and **context engineering** to convert manual, repetitive workflows into reliable AI-driven automation pipelines.

EDUCATION

B.Tech, Artificial Intelligence & Data Science

CGPA: 8.72 / 10

Mahendra Engineering College, Tamil Nadu — Final Year

CERTIFICATIONS

NPTEL — Cloud Computing | NPTEL — Java Programming

ACHIEVEMENTS

- Finalist across multiple hackathons: MSME Hackathon, SAP Hackathon, CATCH 2024 & 2025, EDU-HACK INSPIRE.

- Presented research paper at academic symposium; Event Core Member, Alnnovat Innovators Club; Anti-Ragging Campaign Leader.
